

## THINK Module.

The story is told of Sir Isaac Newton in the year 1665, sitting under a tree when an Apple fell on his head. He thought "Why did the apple fall down instead of up?" Upon more questioning and focused thought, he discovered GRAVITY! That which we take for granted.

The only thing which sets us apart from animals and plants is our Ability to think. Everything else can be found in a spider or flowers. We humans can think up a solution, and before you know it – it becomes reality.

To think is to answer a question. The Think module puts this in the form of problem solving. Providing strategic methodologies in developing a workable plan of action which is fully documented.

### The Methodology

Using the Natural components of the head – we formulate a plan of action:

#### BRAIN

Master planner, most powerful  
Processor known to mankind.  
Developing the complete picture

#### EYES

Make plan visual.  
Start with the end view.  
Design the final blueprint.

#### NOSE

To smell a rat, detecting  
the unseen pit falls.  
Sit back and senses  
potential issues.

#### EARS

Market research – Balance.  
Listen to both Positive and  
Negative views.

#### MOUTH

Speak with clarity.  
Asking with intelligence.  
Communicate solution  
with refined speech.

### Benefits of the Think Module:

Discover strategic principles to aid in the creation of problem solving.

Discover the immense value in Prescribed Thinking

Design unique blueprints with visual milestones from problem to ideal solution
