

## GOD Module.

### Identifying MY Purpose in a beautiful yet complex world

This was Isaac Newton's inspiration (*have you ever heard of him?*) - The inner ability to push boundaries and find solutions which are unique and sustainable - that place of the abundant supply of spiritual wealth that helped him connect to the Creator and live an abundant and a very productive and impactful life.

#### BIGGER PICTURE

**WHO sets the planet in motion and why?**

Tap into our almost 'God like' creative powers and character, to bring something different, good, unique and individual to the table.

#### DEEPER PICTURE

**Who am I? Why am I here?**

Delve deeper into yourselves, our composition to identify our values and potentials in a VUCA World realising that there is really no substitute for You.

#### CONNECTIONS

**Know where your dot fits.** Draw from examples of people like you and I who made these connections and left the world a better place for us all.

How to use the SDG's as a starting point  
Start by looking at the SDGs, interpret in our own words, in our own context, define your own unique role to make a difference.

#### Benefits of the God Module:

- Discovering our creative Nature and purpose.
- Self-reflection to discover inner truths and talents.
- Strategic momentum towards a more wholistic reality.
